

KYRGYZSTAN

Expedition 2017

CACSEE offers a unique three-week field trip in the summer 2017 to explore the country in the heart of the Tian Shan Mountains. You are welcome to join us on the following tour:

August 03 – August 23

Our field trips addresses students and scholars of biology, geography, environmental management, agriculture, forestry and of social sciences.

Environmentalists, friends of nature, mountaineers and curious globetrotters of all ages are welcome as well.

The scientists from the Kyrgyz National University and the Kyrgyz Academy of Sciences will accompany the expedition. They will provide you with special lectures focused on different fields of their research: botany, zoology, geology, agroecology, forestry, and environmental protection of Kyrgyzstan. In addition, trips to the mountains and sightsseeing tours will be offered.

Professional qualification, prior knowledge and foreign language skills are not required.

Program

The expedition route and the draft of the program overview below are variable and might slightly change. At this early stage of planning we cannot guarantee that all excursion destination points will be reached, especially due to adverse circumstances (weather, road conditions, etc.) There is a possibility open to target other exciting places according to the interest profile of the group. Please note that not all stops are listed in the program overview.

Day	Events
1	Arrival at Bishkek Airport. Your guides and translators are already waiting to take you to the tent camp, where we stay for 3 nights. Recreation and adaptation, first steps, introduction.

Organisation and logistics

Scientists and interpreters

All Kyrgyz scientists are well acquainted with the excursion area where they conduct research. Thanks to their extensive experience they will provide a solid professional background to the field trip. They will also accompany us during the visits of farms and nature reserves.

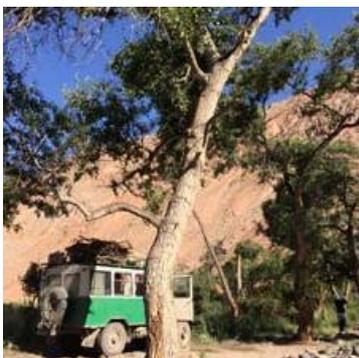

During the whole time of expedition, we will be accompanied by interpreters who translate the lectures of the Kyrgyz scientists into English. They will be also available for other tasks, such as museum visits, city tours, visits to doctor, etc.

Accommodation

We usually camp at the local farmers and campsites. In some circumstances, it may be possible to rent tents and sleeping pads in Kyrgyzstan. However, we strongly recommend to bring your own equipment.

Transport

We offer cross-country busses or trucks for the transportation. They will be available during the whole duration of the expedition. This, the subgroups can be transported flexibly to their day trip destinations.

Boarding

The expedition will be accompanied by Kyrgyz chefs and cooks. They cook for us 3 typical meals a day. On request, also vegetarian. For day trips in the mountains picnics will be prepared.

Hikes and day trips

The guided hikes in the mountains are not extreme tours and well manageable for all participants under normal circumstances. In some areas, mountain tours are somewhat more challenging due to length and/or height difference. This will be discussed in detail.

CACSEE

Central Asian ad Caucasus School for Ecological Education

was founded in Berlin, Germany in 2014. We promote academic and environmental exchange in the post-soviet area. We create cooperation networks between European,

Central Asian and Caucasian universities and NGOs. We support the local initiatives of ecological tourism, faire trade, wildlife conservation and environmental education. We organise field trips, summer schools and expeditions in the area. We get you in touch with unique landscapes, natural ressources, cultural heritage and the opena hearted people all over Central Asia and Caucasus.
